**Bovatec®:** For control of coccidiosis, and improved rate of gain and feed efficiency.

**Clarify®:** Helps decrease fly populations by stopping them in their larval stage.

**MOS:** (mannan oligosaccharides) yeast extract prebiotic to develop and support a healthy gut microbiome.

**FAF:** Fatty acid formulation includes MCTs and other highly digestible sources to mimic a whole milk profile for maximum energy, growth and development.

**MCTs:** Medium chain triglycerides allow for maximum energy to be quickly allocated to growth and development.

**L-Carnitine:** Increases the rate of fat oxidation to enhance the utilization of stored fats.

**Digestarom®:** A mix of essential oils, herbs, spices and extracts to optimize feed intake and protein digestion and utilization.

**A.A. Advantage:** Optimized amino acids to account for feeding a high plane of nutrition for maximum growth potential.

**Organic Trace Minerals:** Provide optimum bioavailability.

**Plasma:** Enhances IgG levels for optimal intestinal environment and protection against pathogens.

**Soy Protein Blend:** Protein sources from milk and soy provide a full growth potential product at a competitive price.

**b-Glucan:** A natural prebiotic that promotes the innate immune system's ability to fight pathogens.
