EQUI-PRO®

FEEDING RECOMMENDATIONS

The minimum feeding requirement on all Poulin Grain EQUI-PRO® feeds to meet the nutritional requirements of a 1000 lb equine is 4 lbs per day.

Feed with good quality hay (1.5-2lbs/100 lbs of body weight), free choice salt and clean water.

Divide feed into a minimum of two equal feedings. Never feed more than 0.5 lbs of grain per 100 lbs of body weight in a single feeding.

All dietary changes should be made slowly over a period of 10-14 days.

If your horse has dental problems/trouble swallowing, products can be soaked in a small amount of water before feeding.

If you would like to have your horse's diet evaluated to ensure it is balanced for all critical nutrients, please contact your Poulin Grain feed specialist.

Complete feeding guidelines can be found on product packaging and on our website.

PERFORMANCE

Textured high fat, low sugar energy feed which provides long-term sustainable energy for endurance, performance and underweight horses.

PROMAX

Pelleted high fat, low carbohydrate feed with energy sources that provide long-term sustainable energy for endurance, performance horses and underweight horses.

PERFORMAX

Textured high fat, low sugar feed with energy sources that provide long-term sustainable energy for endurance, performance and underweight horses.

MARE & FOAL

Textured feed formulated to meet the needs of foals, weanlings, yearlings, and pregnant and lactating mares.

PREMIUM SENIOR

Pelleted feed specifically formulated to meet nutrient needs of the senior horse. With Glucosamine (660 mg/lb)

EAST COAST RACE

A one-of-a-kind textured feed designed to maximize athletic performance in both training and racing.

FORAGE EXTENDER

Formulated to provide essential quality fiber in the horse's diet. May be used to replace up to half the forage in an animal's diet on a pound for pound basis.

CALORIE-PLUS

Dry fat supplement for horses, designed to provide energy (calories) for weight gain and exercise performance.
