Kid-Gro ASure is a product of Denkavit USA

Forage quality, breed and other conditions determine ideal products and amounts that should be fed.

Contact Poulin Grain for complimentary forage testing and diet balancing for optimal performance!

## Goat Feeding Recommendations

### Day 1:

Feed high quality colostrum at a minimum of 10% of the kid's body weight. Ex: A 10 lb (160 oz) kid needs 16 oz colostrum total. Feed 50% within 2-4 hours of birth, and the other 50% within 24 hours of birth.

### Day 2, Onward:

Offer free choice, fresh clean water at all times. Offer free choice **Lamb N' Kid Pellet** beginning with small amounts, until 100 lbs body wt. OR offer free choice **Meat Goat Pellet** until they reach slaughter weight. (Both options contain Ammonium Chloride & Decoquinatate).

### Day 2-49:

Feed **Kid-Gro ASure** milk replacer following tag directions. See poulingrain.com for milk replacer feeding tips and schedule.

### Day 28, Onward:

Introduce good quality 2nd cut hay, starting with a small handful daily (ideally 5-10% of total dry feed).

### Maintenance Goats:

Switch to **Sweet Goat 18%** (does not contain Ammonium Chloride) at about 4-6 months of age, or when they reach 100 lbs body weight. Feed 0.5-1.5 lbs grain per day in addition to forage.

### Lactating Goats:

Switch to **Dairy Goat Pellet** in addition to forage. Feed 1 lb of grain per 2-3 lbs of milk produced daily.

### Meat Goat/ Wether or Buck:

Feed free choice **Meat Goat Pellet** (contains Ammonium Chloride & Decoquinatate) until reach slaughter weight (no additional forage is needed). Or use at a lower rate as maintenance for male goats in addition to forage.

### Goat on Pasture or Forage Only Diet:

Offer free choice **Goat Mineral** in addition to good quality hay or pasture. Optimal intake is 1-2 oz/head/day.

### Poor Quality or Lack of Forage:

Feed **Forage Extender Mini Bites** to replace up to half of the forage in the diet, pound for pound.

## Lamb N' Kid™ Starter Pellet

**Starter Pellet for lambs and kids 4 days old to 100 lbs of body weight**

- Medicated with Decoquinatate to prevent coccidiosis. No withdrawal time, so product can be fed right to slaughter
- Highly palatable pelleted feed, fully fortified
- GIT Activator™ probiotics, prebiotics and enzymes for optimal feed efficiency and performance
- Ammonium Chloride aids in prevention of urinary calculi in young male lambs and kid goats

## Stock NCA Sweet 16%™

**Textured feed for a variety of stock**

- Highly palatable to encourage consumption
- No copper added, suitable for sheep, goats and cattle
- Yeast culture for improved gain and feed efficiency

## Sweet Goat™

**High energy textured feed for all goats**

- Highly palatable to encourage intake
- Fully fortified
- Contains high energy for lactating goats
- Added copper, do not feed to sheep

## Meat Goat Pellet™

**For meat goats 4 days old until market weight. Also suitable for male pet goats**

- Highly palatable to encourage consumption
- Fully fortified, high energy feed to meet the nutritional needs of rapidly growing meat goats
- Yeast culture for increased rate of gain and feed efficiency to bring animals to market weight faster
- Ammonium Chloride to aid in prevention of urinary calculi
- Medicated with Decoquinatate to prevent coccidiosis. No withdrawal time, so product can be fed right to slaughter
- Complete feed, no additional forage needed
- Contains added copper, do not feed to sheep

## Dairy Goat Pellet™

**Formulated for lactating dairy goats to achieve efficiency and high milk production**

- Antioxidants including Vitamin E and organic selenium
- Specifically formulated for the Northeast to support vascular and immune health
- Roasted soybeans provide a high quality source of bypass protein for increased milk production
- Yeast culture for increased digestive health and feed efficiency
- Beet pulp, a high quality fiber and energy source
- Fully fortified with organic minerals for optimal bioavailability
- Contains added copper, do not feed to sheep

## Forage Extender™

**Essential quality fiber for when hay is poor quality or in short supply**

- May be used to replace up to half of the forage in the diet on a pound for pound basis
- Features sources of highly digestible fiber - Soy Hulls, and Dehydrated Alfalfa Meal
- No molasses
- 80% digestible fiber vs. a maximum of 50% digestible fiber in hay
- 12% protein vs. hay protein of 5-8% (depending on crop). Provides consistent nutritional content vs. the variability seen in hay.
- Reduces dust and mold exposure
- Yeast Culture is added to aid in the proper digestion of fiber, improving feed efficiency
- Flavored to enhance palatability
- Economical and available: Average 35% cost savings over other hay replacement products
- Available in Forage Extender Mini Bites (standard pellet), or Forage Extender Super Bites (large pellet)
- Suitable for cattle, equines, sheep, goats, rabbits and camelids

## Goat Mineral

**A loose complete vitamin and mineral for growing and mature goats.**

- Contains yeast culture, proven to increase rate of gain and improve feed efficiency
- Chelated trace minerals allow efficient absorption and utilization, promoting bone, muscle, and tissue strength during growth
- High levels of Vitamin E and organic Selenium for improved health and immune function
- Feed as the sole source of salt
